

How to Enter Books into Voice

Using the example of Darrell Bock's book, first, enter the title.

Progressive Dispensationalism

Start writing or type / to choose a block

On the right column, scroll down and in the Contributors section, type in the authors. They should automatically pop up as you begin to type. Choose from one of the autopopulated authors. If a book has more than one author, make sure all are added here.

Further down the right column is an option to put in a Book Cover Image. DO NOT PUT ANYTHING HERE! This will mess up what pulls from Amazon in the next step.

Next, pull up Amazon and search for the book. In this case the book came right up, but for some titles you may need to add the author's name in the search bar as well. If you cannot find the book on Amazon, ask the author if the book is on Amazon. The link for the book MUST come from Amazon. This may change in the future, but for now, the website is coded to recognize Amazon links.

There are two pieces of information you need from Amazon: the link and the ISBN-13 number. For the link - this is the link that appears in the web browser's address bar at the top of the screen. HOWEVER, that link has a lot of extra information in it. You'll see the letters "ref=sr...", delete that and everything after it. The link should then end with a series of numbers and a slash mark. See below for an example.

The ISBN number is fairly straight forward. Be sure to grab the 13, not the 10 number. This is what cues WordPress to pull the book cover.

Leave everything else blank. Then hit Publish (or Update).
